6" Fascia Rain Gutter

Our most popular model. Its deep back design with built-in drip edge allows it to be used with or without fascia board.

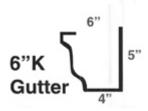

Capacity: 1.05 gal per lineal foot, approximately 241 1/2 cu. in

5" K Rain Gutter

A classic gutter commonly used on existing homes. A drip edge flashing is required to allow this gutter to work at it's best. Capacity: 86 gal per lineal foot, approximately 198 cu. in

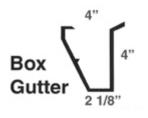

6" K Rain Gutter

A larger version of the popular 5" K gutter, it is excellent for both residential and commercial applications. A drip edge flashing is required to allow this gutter to work at it's best.

Capacity: 1.3 gal per lineal foot approximately 300 cu. in

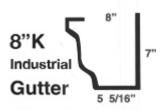

4" Box Rain Gutter

A small version of the 6" Fascia gutter. Commonly used where limited clearance will not allow a standard sized gutter.

Capacity: .64 gal per lineal foot, approximately 147 cu. in :

8" Industrial Rain Gutter

Our 8" K style continuous gutter is perfect for your commercial/industrial project. The 8"K gutter provides an outstanding ability to move large quantities of water from your roofing system with a clean professional look. Our 8" K style continuous gutter is only available in 24 gauge. Capacity: 2.4 gal per lineal foot, approximately 559.13 in per 12"

All of our gutters are available in a variety of colors and metals. Contact us today to find the perfect fit your home or business!
